

HYDRAFACIAL CONTRAINDICATIONS

You cannot receive HydraFacial if you have any of the following:

Are Pregnant/Nursing

Have Active Cancer

Had Facial Procedures/Treatments:

Facial Waxing within 5-7 days

Botox within 1 week

Fillers within 2 weeks

Laser Treatment within 3-4 weeks (or until healed)

Medical Grade Peel within 4 weeks (or until healed)

Accutane, or similar treatment, within 6 months

Have Active Skin Conditions:

Moderate to Severe Acne (Grades III & IV)

Cold Sore

Rash

Sunburn

Eye & Lip Perks cannot be performed if there is any type of infection in these areas.

Recommendations Pre- & Post-Treatment:

- Refrain from any type of exfoliating treatments to the area of treatment for 48 hours pre & post treatment including both OTC & prescription acne treatments, hydroxy acids & retinols.
- If prone to cold sores, it is recommended to take a prophylactic 48 hours pre & post treatment.
- Avoid sun exposure & tanning beds for 72 hours pre & post treatment. It is important to be diligent with SPF following a treatment, by reapplying every 2 hours if spending time outside.
- For gentlemen, shaving is not recommended for 24 hours pre & post treatment. Also, please note that gentlemen with full beards may not receive the full benefit of the treatment in areas where there is facial hair.
- Fillers & other injectables should be avoided for 24 hours post treatment.
